# WHAT IS SMART CONTRACT ?

DIVINE LITE

Smart contracts, like cryptocurrencies, are decentralized. They work strictly according to the underlying program, without the possibility of subsequently changing the defined execution. The code that contains all the logic of the contract expiration is on the blockchain and all calculations are provided by millions of computers around the world. This ensures that there is no risk of hacking into the smart contract and stopping the project.

The blockchain is an immutable record of transactions and information, which is cryptographically protected from any subsequent manipulation using thousands of independent computers worldwide.

## DECENTRALIZATION

?

What does "decentralized" mean ? What are the advantages and what are the benefits ?

Decentralized marketing is created with an automated contract that offers you maximum security and sustainability. A smart contract is an automatic execution algorithm. It exists within the Tron blockchain, one of the TOP cryptographic currency.

# WHAT IS A BLOCKCHAIN?

DIVINE LITE

A blockchain is a distributed database or ledger that is shared among the nodes of a computer network. As a database, a blockchain stores information electronically in digital format. Blockchain are best known for their crucial role in cryptocurrency systems, such as Bitcoin, for maintaining a secure and decentralized record of transactions. The innovation with a blockchain is that it guarantees the fidelity and security of a record of data and generates trust without the need for a trusted third party.

## Fiat Money

Physical medium of exchange.

Represented by bills & coins.

Unlimited supply. Government can produce as needed.

Issued by a government.

Centralized. Issued and controlled by law and banks.

Value determined by the market and regulation.

## Cryptocurrency

Digital medium of exchange.

Represented by 1 private and 1 public pieces of code.

Limited supply. Each cryptocurrency has a set maximum. Produced by computers. Decentralized. Not controlled by any government or entity.

Value determined by supply and demand.

**BASED ON BLOCKCHAIN SERVER**

Unlimited Supply

# HOW BLOCKCHAIN WORKS?

1. Alice wants to send money to Bob.

2. The first block is created online and represents the transaction.

3. This Block is broadcast to every party in the network.

4. Those in the network approve the transaction and validate it.

5. The block is then added to the Chain which provides a permanent, non-repudiable and transparent record of the transaction

6. Bob receives money from the Alice

Note: Transactions are not valid until added to chain. Tampering is immediately evident. The Blockchain is regarded as safe as everyone in the network has a copy. The source of any discrepancies are usually evident immediately.

# ICO & IEO - Use of Funds

DIVINE LITE

It is time to continue building all of our projects and to scale up globally. In order to reach this level, it is necessary for the company to organize its structure, continue to improve the technology behind the system and dedicate resources to marketing.
